

We're All In This Together

No need to point fingers
No need to hide
It's ok if you feel a little shame
I too felt it, and wanted to keep it inside
No one is better than the next one
We all have a story to tell
I'm no longer afraid to raise my hand
Go ahead and tell yours, I'll tell my mine as well

Have you heard "Each One Teach One"
To me it's more than a phrase
To my surprise you taught me something new
You may also benefit from what I have been Through
With each new passing day
We live our lives, there's so much to do, and that's ok
Open up to possibilities, once thought out of reach
No diploma needed, I'm ready to learn if you're ready to Teach

What you're going through matters to me
My Friends, your Safety and wellbeing allows me to sleep
We all Matter, we were not put here to do Life on our own
We're all in this together, Let's keep being there for one
another
I'm thankful knowing no one has to do this alone
